

K-KMC-3X 3-Axis CG Measurement Fixture With Automatic Rotator

The K-KMC-3X 3-Axis CG Measurement Fixture with Automatic Rotator enables precise measurement of an object's 3-axis Center of Gravity with a single operation. With the K-KMC-3X, additional fixtures to rotate the specimen 90 degrees for Z-axis measurement are no longer required. The device features automatic rotation angles, predefined in the user interface, ranging from 10 to 30 degrees, with all calculations handled by the software. With just one click, users can measure the X, Y, and Z axis Center of Gravity values of the specimen in less than a minute.

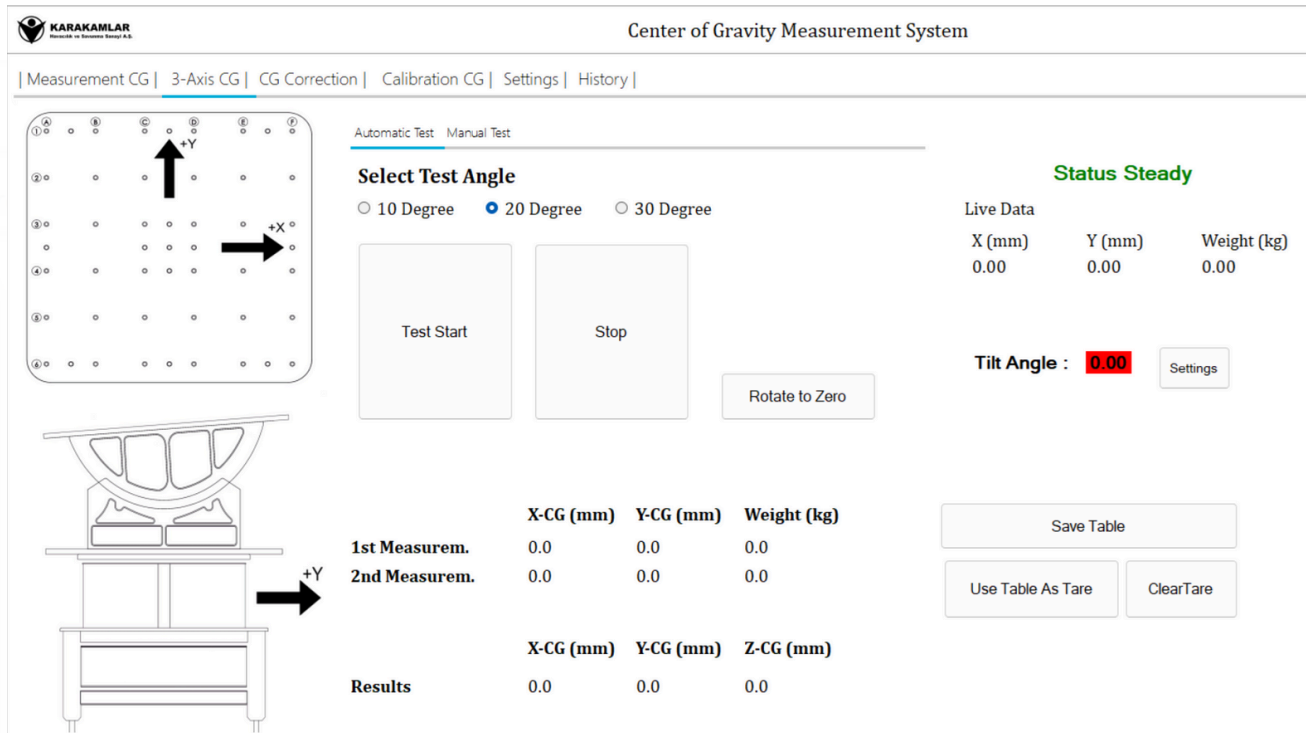

TECHNICAL SPECS

MAX. WEIGHT	300 kg
ANGLE RANGE	0-30 Degrees
ANGLE READING SENSITIVITY	0.03 Degrees
APPLICABLE DEVICES*	K-KMC-CCC and K-KMC-D

- K-KMC-3X Fixture only works with the applicable devices

Please contact us for more information and for different requirements.

The K-KMC-3X is totally integrated to K-KMC User interface and all controls, taring and calculation can be done via software.
